How to Access Online Library Databases from Outside Campus

Proxy Setting for Online Library Databases

1. Open Internet Explorer.
2. Select “Tool” and then select “Internet Option”
3. Select the “Connection” tab at the top of the dialog and you will see a dialog as shown below.

4. Click at “LAN settings” button, you will see the following dialog.

5. Select “Use automatic configuration script” and unselect all other check boxes (if selected)
6. At the “Address”, type http://au.edu/proxy.pac as shown in the in the image.
7. Click OK button.

The proxy script will detect if you try to access the Online Library Database website. If you do, it will ask for your username and password (AU Internet Account).

If you need assistance using proxy services, please contact Office of Information Technology Service (ITS) at 02-3004543-62 ext. 3333.
