*EBSCO Discovery Service* (EDS) provides you with access to your institution's entire collection via a single entry point. In this tutorial, we will look at performing a keyword search and review the unique features available within EDS. Because the EDS interface is customizable by administrators, your search experience may vary from this demonstration.

EBSCO Discovery Service provides users with an easy, yet powerful means of accessing all of an institution's information resources through a single search. This is achieved by harvesting metadata from both internal (library) and external (database vendors) sources, and creating a pre-indexed service of unprecedented size and speed. Although the resulting collection can be massive in size and scope, the fact that it is indexed locally (on the EBSCOhost® servers) allows for exceptionally fast search response times. As no two institutions are the same, EBSCO Discovery Service offers a vast array of customization options with regard to both the underlying collection of metadata as well as the front-end delivery of search results. All of this functionality is based upon the powerful EBSCOhost search experience familiar to researchers worldwide.

**Note:** With many customization options for available to administrators, your EBSCO Discovery Service appearance will be unique.

## EBSCO Support Site

EBSCO's [Support Site](#) is available 24 hours a day, 7 days a week. Our FAQ database, [tutorials](#), and user guides can provide answers to your technical questions.

EBSCO Customer Support Representatives are also available by [phone](#) and [e-mail](#) 24 hours a day, Monday through Friday, as well as Saturday and Sunday from 9 a.m. to 5 p.m. (US EST).
